

Pool Suites at the Temples Gates

Templation is the closest resort to Angkor Wat, in Siem Reap. It is a green modernist estate composed of hidden suites and villas, most with their private pools, scattered amid a vast expanse of tropical flora. It has a breezy lounging and dining area, a spa, a gym, a shop, a meeting room, and the Angkor Database Library. All roofs are planted and spaces are open for natural airflow. Rainwater is collected and a significant part of the power used is solar. The property has several Jungloos (or jungle igloos) as a glamping tented retreat (see Jungloo factsheet).
